

Name: _____

Plate Tectonics

Across

- 3. Cracks in earth's crust where earthquakes occur
- 5. Landform found at a convergent boundary when a continental plate meets an oceanic plate
- 8. Boundary where two plates separate
- 10. Form of heat transfer that causes plate movement

- 11. Landform found at oceanic divergent boundary
- 12. Landform found a convergent boundary when land meets land
- 13. The name of the supercontinent when all continents were connected

Down

- 1. When a dense ocean plate sinks under a continental plate
- 2. Boundary where plates slide past one another
- 4. Landform found at convergent boundary where two ocean plates meet
- 6. Landform found at continental divergent boundary
- 7. Boundary where two plates move together
- 9. What is formed at a transform boundary
