

Plate Tectonics

Across

1. This is shapes and features of land viewed in two dimension.
 3. This makes up 15 percent of Earth's volume.
 4. This makes up of sedimentary and metamorphic rock.
 6. This is in the middle of the continental plate.
 11. This is a line connecting points on a Topographic map.
 16. This makes up 84 percent of Earth's volume.

17. This is two fragments of the lithosphere that collide together.
 18. This is a place where there is volcanic islands. (Ring of Fire)
 19. This is below the lithosphere and is the upper layer of the mantle.
 20. This is pictures of land masses taken from outer space.

Down

2. This is meant to develop or to have direction.
 5. This is made of pictures recorded on paper for traveling far distances.

7. This is the closely marked contour lines on a map.
 8. This is the height above sea level.
 9. This is made of underwater mountain ranges.
 10. This is in other words called conservative plate boundary.
 12. This is made of deep depressions in the sea floor.
 13. This theory is made up of a super continent.
 14. This is made of cracks in the Earth's crust.
 15. This consists of the upper mantle and crust.
