

Plate Tectonics

Across

3. Heat transfer by the movements of currents.
 4. A transfer of energy through space.
 5. A soft layer that bends like plastic.
 6. Deep underwater canyons.
 7. Continuous adding of new material to the ocean floor.

8. Continents slowly moving over Earth's surface.

10. What is the process of the sea floor sinking into the mantle?

Down

1. The flow that transfers heat within a fluid.
 2. The uppermost part of the mantle.
 9. A crack in Earth's crust.
