|   |    |    |   |      |   |    |   |   |  |          |   |   |   |   |     |   |  |
|   |    | 13 |   |      |   |    |   |   |  |          |   |   |   |   |     |   |  |
|   |    |    |   |      |   |    |   |   |  |          |   |   |   |   |     |   |  |

## Across

- **1.** What process occurs when mid-ocean ridges continually add new material to the ocean floor?
- **2.** What is it called when plates slip past each other?
- **6.** What was Wegener's hypothesis known as?
- **8.** What is a trace of an ancient organism preserved in rock?
- **10.** What is the theory called that involves sea-floor spreading, Earth's plates, and plates motion

- **11.** What is it called when plates move apart, or diverge, from each other?
- **12.** What is it called when plates come together, or converge?
- **13.** What is it called when when the ocean floor plunges into deep underwater canyons?

## Down

- **3.** What do scientists call mountain ranges in that form in the middle of some ocean floors?
- **4.** What is the type of valley called that happens when Earth's crust diverges on land?

- **5.** What breaks in Earth's crust where rocks have slipped past each other that form along plate boundaries?
- 7. What process occurs when the ocean floor sinks beneath a deep-ocean trench and back into the mantle?
- **9.** What did Wegener name the supercontinent?
