

# Plate Tectonics

**Across**

- 3. Is an underwater mountain range.
- 5. Heat transfer within a material or between materials that are touching.
- 7. Is the heat transfer by the movement of currents within a fluid.
- 8. Results from a force pressing on an area.
- 9. Is the layer of rock that forms Earth's outer skin.
- 10. All the continents together in one giant landmass.

**Down**

- 1. The place where two plates come together.
- 2. Is the process by which denser oceanic crust plunges under continental crust.
- 4. Are breaks in Earth's crust where rocks have slipped past each other.
- 6. Is any trace of an ancient organism that has been preserved in a rock.
