

Plate Tectonics and Earthquakes

Across

3. supercontinent
7. the kind of waves that travel through the interior of earth
8. The slower body wave
9. the type of boundary where two plates move together
10. the type of boundary where two plates move away from each other.
11. the center of an earthquake

Down

1. the kind of waves that travel across the surface of earth
2. the movement of the large sections that form the Earth's surface
4. the type of boundary where two plates move against each other
5. The faster body wave
6. the boundary between the crust and mantle
