## Plate Tectonics crossword puzzle

## <u>Across</u>

 When a magnetized objects that usually point north reverse their direction
 When a plate a lesser density goes under the plate with more density
 These are formed from a Convergent

Boundary and continental crust hitting continental crust

**10.** A process When new oceanic crust forms on a mid-ocean ridge

**12.** This was the other continent formed when Pangaea split

**14.** This is in the mantle and above the Lithosphere

**17.** This was the first continent alson known as a super continent.

18. This was also a piece of evidence used by Alfred Wegner to prove his theory. This piece of evidence includes wether and its change over time called
19. This was used as evidence by Alfred Wgner to prove his theory. This piece evidence is about animals and where they lived called

20. When two plates collide Down

1. When two plates rub against each other forming and earthquake

3. These are mountain ranges in the

middle of the ocean

4. This was one of the continents formed when Pangaea broke apart

Word Bank

Transfom Boundary Alfred Wegner Pangaea Climate Volcanoes Seafloor spreading Mid-ocean ridges Convergent Boundary Reversed Polarity Divergent Boundary

Mountains Magnetic Reversal Lithosphere Fossil Evidence Gondwana

7. This man created the theory that all the continents were once one continent8. When objects that use magnetics to operate point themselves north9. When two plates separate

11. When magnetized objects reverse direction and point south

**13.** These are formed from a Divergent Boundary and Oceanic crust moving away from oceanic crust

**15.** This is in the mantle and below the asthenosphere

**16.** These are formed from a Convergent Boundary and ontinental crust hitting oceanic crust

Laurasia Subduction Normal Polarity Trenches Asthenosphere
