# Plate tectonic

## Across

5. What is the most rigid outermost shell of a planet made up of the crust and upper mantle  
 8. What are mountains filled with magma  
 12. Earth's thinnest layer  
 14. A place with the world's active volcanoes (most active)  
 15. Which plate boundary is happening when two plates pull apart from each other  
 16. What is the movement of Earth's continents relative to each other

18. What is the name of the continent that began to break apart about 175 million years ago  
 19. What is the location where 2 plates meet  
 20. Part of the earth that is directly below the crust

## Down

1. A place where the sea floor is forced under continental plates  
 2. Deepest part of the ocean  
 3. How many types of plate boundaries are there  
 4. Who proposed the theory of the continental drift

6. Which plate boundary haven't I mentioned yet  
 7. What is the theory that Earth's outer shell is divided into several plates that glide over the mantle  
 9. How many continents are there  
 10. What place is a continent as well as a country  
 11. Which ocean is the largest  
 13. How many oceans are there  
 17. Which plate boundary is happening when two plates slide past each other forming a fault
