## Polygons

## Across

3. I am a special type of parallelogram, with all my angles equal to 90 degrees. But I am not a square. Who am I?
4. The name of a polygon with six sides
5. The special name given to a regular quadrilateral
6. Who am I? I have three sides and all my sides and angles are equal.
7. If a polygon has an angle sum of 900 degrees, how many sides does it have?
8. The name of a polygon with ten sides
9. Who am I? I have four sides and all my sides are equal. But I am not a square. Down
10. What is the name of a polygon with eight sides? 2. An equilateral triangle has how many lines of symmetry? 4. I am quadrilateral with two pairs or parallel sides 5. The name of a polygon with four sides
11. The name of a polygon with five sides
12. Who am I? I am a quadrilateral with only one pair of parallel sides
13. A square has how many axes of symmetry?
14. If a polygon has an angle sum of 540 degrees, how many angles does it have?
15. A rectangle has how many axes of symmetry?
16. If a polygon has an angle sum of 1080 degrees, how many sides does it have?
