

# Polygons

## Across

- 6.** When only one angle is 90  
**8.** All angles are less than 90  
**9.** Having no sides congruent  
**10.** Has two sets of parallel lines  
**12.** Quadrilateral with 4 sides congruent and 4 right angles

**13.** Is three sided Polygon

**14.** When a polygon has two congruent

## Down

**1.** When a triangle has all sides congruent

**2.** When all sides are congruent and interior angles congruent

**3.** Is a quadrilateral with no parallel lines

**4.** Has ONE set of parallel lines

**5.** one angle is greater than 90

**7.** Has 4 right angles

**11.** Is a special Parallelogram with 4 congruent sides
