## Polynomial Review

## **Across**

- **1.** Terms that have the same literal coefficients.
- **3.** In algebraic term, it is the numerical factor (number).
- **6.** An expression made up of one or more terms.
- 11. In an algebraic term, it is non-numerical factor (letter).
- **12.** A number, variable, or product of numbers and variables.

- **13.** The answer when you combine two opposite, identical terms.
- **14.** A polynomial with two terms.
- **15.** A statement formed by two expressions related by an equal sign.

## Down

- **2.** Another word for variable is.
- **4.** In an expression, it is the number without a literal coefficient.

- **5.** Terms that have different literal coefficients.
- **7.** A polynomial with three terms.
- **8.** Numbers and variables combined by operations.
- **9.** The value of the greatest exponent of a term in a polynomial.
- **10.** A polynomial with one term.
