

Population Dynamics

Across

- 4. Anything that stops a population from growing is called a _____
- 5. When the population growth is growing at an increasing rate. This causes a J shaped curve
- 6. Space and food are examples of _____
- 8. When _____ exceeds _____ the population will increase
- 11. When the population growth slows down, and the population begins to level off

- 12. Natural disasters are an example of this type of factor
 - 13. A density independent factor caused when humans break an ecosystem into smaller pieces
 - 14. Another cause of decreasing population other than death
- Down**
- 1. When a population exceeds its carrying capacity, this is called an _____
 - 2. The limits of the environments ability to support the lion population for the long term.

- 3. More geese moved into the Columbia river basin causing an increase in the population this is called _____
- 7. When excess nitrogen or phosphorous is released into waterways it can cause _____
- 9. A population is a group of one _____ living in one area and interacting together.
- 10. If a population had unlimited resources, what type of growth would they show?
