

Potassium

Across

2. _____ membrane is selective for K⁺
6. _____ occurs when K⁺ levels are below 2.5 mmol/L
8. _____ is major site of K⁺ regulation.
9. Regulates _____ of substances into cell via Na/K pump
10. _____ renal excretion can lead to hyperkalemia

Down

1. K⁺ level is 20x greater _____ cells
3. Regulates _____ phase in the heart
4. Muscle weakness and irregular _____ occurs when K⁺ levels are too high or low.
5. Sample should be stored at _____ temperature
7. Hemolysis of sample will cause _____ K⁺ levels
