

Name: _____

Date: _____

Probability

Across

- 6. the process in probability of performing repeated trials of an activity for obtaining data in order to be able to predict the chances of certain things happening
- 9. the particular result of an experiment
- 10. number of times a probability experiment is conducted
- 11. probability determined by conducting an experiment and gathering data

Word Bank

- | | | | |
|-------------------------|------------|-------------|------------------------|
| trial | unlikely | likely | certain |
| experimentalprobability | evenchance | experiment | outcome |
| samplespace | impossible | probability | theoreticalprobability |
| chance | event | | |

13. an outcome that will probably happen

14. an outcome that will probably not happen

Down

- 1. an outcome that can never happen
- 2. probability determined by predicting outcomes rather than by gathering data
- 3. another word for probability

4. the complete set of outcomes or results obtained from an experiment. It is shown as a list enclosed in a pair of braces (curled brackets) {}

5. likelihood or chance of a particular event (result) occurring

7. an outcome that will definitely happen

8. a result that may be obtained

12. an outcome that has a 50% chance of happening
