# Problematic and Desired Conditions

## Across

2. The intentional targeting of civilians to affect their morale
9. The use of this rarely achieves the intended effect directly
10. The use of this strategy is extremely rare
13. Intended to be quick and decisive
15. Forces not being combat capable is what effect of annihilation?
17. Independent variable
19. Oversimplified as killing the enemy leader
20. Using this approach, compellence concepts can be broken into specific target sets

## Down

1. Typically done using nonkinetic information operations; intends for the enemy to turn on itself
3. Lacks definitional rigidity in the military lexicon
4. Targets morale typically through a combination of kinetic attacks and information operations
5. Destruction and disruption are actions to impact the
6. Important only if it causes a functional or behavioral effect
7. At this level of war, lengthy lexicon is insufficiently differentiated to provide value to the planner
8. Dependent variable

11. The Target-Set COG for intimidation

12. The critical vulnerability of exhaustion

14. Can vary widely from dramatic air shows to destroying the ruler's summer palace

16. How many types of denial are there?

18. At this level of war compellence options can be simplified into a choice between destruction and disruption
