

Processes In The Water Cycle

Across

- 3.** the star round which the earth orbits.
5. the quality of being hot; high temperature
7. the gaseous phase of water
8. the conversion of a vapour or gas to a liquid.
11. the process by which water on the ground surface enters the soil.

Down

- 1.** the envelope of gases surrounding the earth or another planet.
2. E.g. Rain, Snow or Sleet

- 4.** Evaporation- the process of a substance in a liquid state changing to a gaseous state due to an increase in temperature and/or pressure
6. a colourless, transparent, odourless, liquid which forms the seas, lakes, rivers, and rain and is the basis of the fluids of living organisms.
9. the draining away of water (or substances carried in it) from the surface of an area of land, a building or structure, etc.
10. a substance that flows freely but is of constant volume, having a consistency like that of water or oil.
