

Proportional relationships

Across

- 2. the point where something begins ,arises,or is derived
- 4. a pair of elements
- 6. a surface of which one end or side is at a higher level than another ; a rising or falling surface
- 9. how something means or cost to something
- 10. vertical axis for a coordinate points along weith which have a value of zero for allother coordinates

- 11. mathematical relationship between two variables that can be by a equation which one variable is equal to a constant times another
- 12. a statement that the value of two mathematical expressions are equal

Down

- 1. important graphing coordinates
- 3. an equation between two variables that gives a straight line when plotted on a graph

- 5. any function that graphs to a straight line
- 7. equal in value,amount,function and meaning
- 8. horizontal axis of a coordinate points along with which have a value of zero for all other coordinates
