

Psych 1

Across

5. Proof of this type of learning is that kids who watch violent tv tend to be more violent
8. A stimulus response that involves an organism to be effective (think Tolman and rats!)
9. Cats who have a reaction to a can opener after it is paired up with tuna
10. You are rewarded for your behavior randomly, not every time
11. Mothers get a rush of this chemical during childbirth; responsible for feeling of safety, commitment, and bonding

Down

1. Experimenter who proved that infants need more than just food to survive, they need comfort and care
2. What happens when there is no more US so the CS wears off
3. Ex of this theory: a student gets \$5 every time they get an A, so this reward removes intrinsic motivation
4. Connections that are utilized frequently develop while those that are not decay
6. A way to organize principles of behaviorism and elaborate its principles
7. behaviors that are paired with good things are more likely to happen than behaviors that are paired with bad things
