

# Psychology Debates

## Across

- 2.** Environment causes behaviour (e.g.; upbringing, poverty)  
**4.** We has control over their behaviour • is responsible for their own actions.  
**7.** Falsifiable, Objective, Replicable, Quantitative data, Experiment  
**9.** helps to understand and prevent discrimination  
**10.** All Psychological can be reduced to simple parts

**11.** Behaviour is determined by the environment

**12.** progresses understanding beyond previous findings • is generalisable to a wide population

**13.** Looks at the whole picture/ individual and Useful when studying individuals

## Down

**1.** Subject to social norms  
 Controversial Able to shape the law / policy Risking stereotyping and prejudice

**3.** Behaviour caused by a feature of the person (e.g. personality, genes)

**5.** Behaviour is predictable and controlled

**6.** Behaviour caused by innate characteristics

**8.** Consent, Debrief, Confidentiality, Deception, Right to withdraw, Protection from Harm
