

Purpose and Targets of the Immune System Lecture Review

Across

- 2. contains instructions for making more viruses
- 3. molecule that allows immune cells to "get a glimpse" inside host cells
- 6. medically significant gram-negative bacterial condition
- 9. largest class of pathogens

- 10. signature molecule of gram-negative bacteria
- 13. medically significant gram-positive bacterial condition
- 14. protective layer around viruses
- 15. type of proteins that span the entire width of the phospholipid bilayer

Down

- 1. benefit of microbes

- 4. opportunistic pathogen
- 5. signature molecule of gram-positive bacteria
- 7. class of pathogens that is not living
- 8. single-celled prokaryotes
- 11. signature substance of fungal cell walls
- 12. external and non-infectious threat to the body
