

Puzzle 2: Angles

Across

10. Are congruent
 11. A pair of non-adjacent angles formed when two lines intersect
 12. A pair of adjacent, supplementary angles
 13. A line that cuts across two or more lines

Down

1. When two lines are crossed by another line
 2. angles that occupy the same relative position at each intersection where a straight line crosses two others
 3. An angle of 180°
 4. When two angles add up to 180 degrees
 5. An angle of 90°

6. Two angles that have a common vertex and a common side

7. An angle that measures more than 90 degrees but less than 180 degrees

8. Two angles whose sum is 90°

9. An angle that measures less than ninety degrees
