

Name: _____

Date: _____

Quadratic Relations

Across

- 4. $y = ax^2 + bx + c$, where $a \neq 0$
- 6. The line that divides a parabola into two halves.
- 8. Lowest Point of a parabola.
- 9. $y = ax^2 + bx + c$, where a is a positive integer, the parabola opens
- 10. The maximum or minimum point of a parabola.

Down

- 1. Highest point of a parabola.
- 2. where the parabola intercepts the x-axis
- 3. The graph of a quadratic equation.
- 5. $y = ax^2 + bx + c$, where a is a negative integer, the parabola opens
- 7. where the parabola intercepts the y-axis
