

Quadrilaterals

Across

2. what is a rectangle?
5. what has all the same sides?
8. opposite angles are what?
10. one pair of parallel sides can also be a what?
12. what has opposite sides where AB is equal to DC?
13. the diagonals of a rectangle are?
14. what has no parallel sides?
15. the base angles of an isosceles trapezoid are what?
16. diagonals of a rhombus are what?

Down

1. nonparallel opposite sides are congruent?
3. what is a Quadrilateral?
4. the interior angles measure to 90 degrees?
6. two angles that share a leg are?
7. diagonals bisect each other?
9. what parallel sides have one pair, it can't be a what?
11. diagonal of a rhombus bisects two angles, what is it?
