

Name: _____

Quarter 2 Physics Vocab.

Across

3. quantity having direction as well as magnitude

4. rate at which something moves

7. having only magnitude/ no direction

8. driving or motivating force

10. strength or energy of physical action or movement

12. resistance when one object moves over another

14. at rest unless changed by outside force

15. speed of something in a given direction

Down

1. quantity of motion of a moving body

2. sum of all forces acting on an object

5. increase in rate of speed

6. opposing forces or influences are balanced

9. large body of matter

11. downward movement under force of gravity

13. body's relative mass/quantity of matter
