

Radiography

Across

2. cause is unexposed
5. cause is incorrect placement of the central beam
8. cause is too little vertical angulation
14. cause is movement
15. controls darkness
17. cause is too much vertical angulation

Down

1. cause is bending the film too much to compensate for difficult placement
3. cause is exposing to the same film twice
4. cause is not placing the film down far enough on the mandibular or not high enough on the maxillary
6. cause is exposed to white light
7. cause is underexposed

9. What X-ray shows the entire tooth and surrounding area
10. What X-ray shows the entire arch on one film
11. controls contrast
12. cause is overexposed
13. cause is incorrect horizontal angulation
16. What X-ray shows the crown portion of both the upper and lower teeth?
