

Name: _____

Radiology

1. Position facing forward, arms outward, palms forward and feet together
 2. Position of lying down on back, face up
 3. Position lying face down.
 4. Ventral Recumbent
 5. Position RAO
 6. Computerized _____tomography
 7. magnetic resonance _____
 8. positron emission _____
 9. frontal plane
 10. front plane
 11. back plane
 12. plane splitting left and right
 13. path of an x-ray beam
 14. ICD-10 codes that are used when there are no signs or symptoms but provider looking for something specific
 15. validation of procedure ordered and performed needed for
 16. screening
 17. Radiologist finds something they were not looking for on the x-ray
 18. Unlisted Procedure claims must also include this
 19. substance or material that lights up the structures being studied so it can be visualized
 20. films taken prior to tan actual image - these are not coded separately
 21. unreadable or underdeveloped films
 22. magnetic resonance angiography
 23. use of sound waves to visualize internal structures
- A. anterior
 - B. posterior
 - C. incidental finding
 - D. Dorsal Recumbent
 - E. -graphy
 - F. Valentine's Day
 - G. prone
 - H. Prone
 - I. coronal
 - J. screening
 - K. MRA
 - L. scout
 - M. CT
 - N. medical necessity
 - O. z codes
 - P. projection
 - Q. are not coded
 - R. imaging
 - S. nuclear
 - T. Right Anterior Oblique
 - U. contrast
 - V. ultrasound
 - W. Anatomic

24. small amounts of radioactive material used to examine organ function and structure

X. tomography

25. image

Y. sagittal

26. February 14

Z. special report
