

Rates Of Reaction

Across

- 4. A chemical change which forms a new substance**
- 8. Material that reduces activation energy**
- 9. Affected by Temperature, Concentration, Surface Area, or the use of a catalyst**
- 10. The things that react together to create the product**
- 11. speeds up a reaction if it gets higher**

Down

- 1. The substances created in a reaction**
- 2. A type of acid**
- 3. reactive particles must collide for this to happen**
- 5. The minimum amount of energy required for a reaction to occur**
- 6. The area of an object that is exposed to reaction**
- 7. The amount of a substance in a solution**
