

Reliability, Validity and Trustworthiness

Across

- 2. A measure of equivalence
- 6. Also a measure of equivalence, but is separated into two parts
- 8. The ability of the findings to be applied to a similar situation and delivering similar results
- 9. Where the test represents specific content
- 10. A measure of how consistently each item measures the same thing

Down

- 1. Where the test corresponds to other variables
- 3. A measure of stability
- 4. Where the test is well designed and looks like it is supposed to
- 5. A measure of agreement
- 7. The accuracy with which the researcher interpreted the data that was provided by the participants
