

Renewable and Nonrenewable Resources

Across

- 6. A nonrenewable resource that was formed from tiny sea animals and plants millions of years ago.
- 7. This is a renewable resource that is made from the differences in air pressure.
- 8. A nonrenewable resource that is made from heat in the Earth.
- 9. This is a renewable resource that is provided every day by a major part of our solar system.
- 10. A fossil fuel that is nonrenewable and is formed for over millions of years.

Down

- 1. A renewable resource that is created from the burning of sugarcane and/or wood.
- 2. This is a nonrenewable resource that is made up of another energy source.
- 3. A renewable resource that is made from rotting plant material.
- 4. This is a nonrenewable resource that is in the periodic table and makes up another energy resource.
- 5. A nonrenewable resource that takes a very long time to form from decomposing organic matter.
