

Renewable energy resources

Across

3. Wind energy
7. Solar energy
8. They are coming from the
9. A fuel cell is an electrochemical cell that converts the chemical energy of a fuel (often hydrogen) and an oxidizing agent (often oxygen) into

12. Fuel cell
13. Biomass energy
14. Geothermal

Down

1. The energy comes from the
2. The moving water contains kinetic energy that can be transformed to
4. Hydro energy
5. Tidal/ocean energy

6. They are mostly derived from plants and animal
10. The magma that lies beneath the earth's crust contains the geothermal
11. This energy comes from the
