

Name: _____

Date: _____

Respiration

Across

4. What type of reaction is aerobic respiration?

9. Respiration that occurs without oxygen

10. The name of the process which reacts glucose+oxygen to produce carbon dioxide+water

Down

1. When lactic acid builds up in muscles, what is created?

2. The name given to 'the sum of all reactions in the body'

3. The site of respiration

5. Anaerobic respiration in plant cells and yeast, results in the production of carbon dioxide and what?

6. During anaerobic respiration, which reactant is not completely broken down?

7. A product of anaerobic respiration

8. Glucose can be stored in muscles as what?
