

Result of Plate Tectonic Movement

Across

5. A result of the surface spreading apart
7. An under water mountain range
8. A plate boundary that causes subduction of plate tectonics
9. Two plates moving away from each other
10. Energy suddenly releasing from a fault

Down

1. The spreading of the ocean floor
2. Two tectonic plates sliding past each other
3. When two tectonic plates converge
4. A land form that occurs from convergent boundaries.
6. A land form that occurs mostly at divergent boundaries.
