Review for 1.1 and 1.2

Across

5. What is the word that we use for a virus that is inactive?
9. What do we call all of the chemical reactions that that help an living thing obtain and use energy, break down nutrients, grow and excrete waste
10. What do we call an organism that is made up many cells? (like you!)
12. What do we call organisms that have to eat other organisms for energy?

14. What do we call the theory in biology that explains the structure and source of all living things?

Down

1. What do we call substances that living things need but cannot make for themselves.
2. What do we call an organisms that can make its own food?
3. What do we call anything that causes a living thing to react?
4. What do we call the process that cells use to release energy from food?

6. What is the last name of the first scientist that invented a microscope?

7. What do we call an organism that is made up of only one cell?

8. What do we call a strand of genetic material that is surrounded by a layer of protein? It can infect and reproduce in a host cell.

11. What do we call the process where living things make more of their own kind (species)?

13. What is the basic unit of life?
