

Review of Cells and Cell Division Activity

Across

- 6.** Sorts out protein and other molecules
9. Provide framework for the cell
10. Membrane covered sacs that transport material in the cell
11. Controls cell activity

- 12.** Contains water and other materials

Down

- 1.** Transport material in the cell
2. Found only in plant cells
3. Separated inside of the cell

- 4.** Where energy is released from glucose to fuel cell activities
5. Help to produce protein
7. Holds organelles, sugar and water
8. A tough, rigid structure just lying outside
