

Name: _____

Date: _____

Review on the lithosphere (rocks)

Across

2. Process of the rocks formed by the cool down of the magma or the lava.
3. The breakdown of rock due to rain, wind, ice, sunlight, and plants.
6. Rock formed from sediments, organic remains, or chemical precipitates.
8. Molten rock that has erupted onto Earth's surface.
10. The transport of fragments of rock by water, wind, ice, or gravity.

11. Igneous rock formed from the cooling of molten rock on Earth's surface.

Down

1. The compaction and cementing of sediment into rock .
4. Rock that has been changed by heat and pressure.
5. Molten rock below Earth's surface.
7. The natural process of adding transported sediments to a landform.
9. Igneous rock formed from the cooling of molten rock below Earth's surface.
