

Review puzzle

Across

- 3. What cell organelle modifies and packages materials?
- 5. What percent of photosynthesis occurs in plants?
- 7. What controls all cell processes with DNA, the genetic information?
- 8. First step of cellular respiration?
- 15. What is the second step of the scientific method?
- 16. Dense areas inside the nucleus that make ribosomes?
- 17. Long, hollow structure found in the cytoplasm?
- 19. Cell organelle where sunlight is used to create sugars?

- 21. Organelle used for storage in plant cells
- 22. What is respiration called when it is anaerobic?
- 23. Compound that absorbs light?
- 24. Process that converts sugar into ATP?
- 25. A tough layer outside the cell membrane in most cells?
- 26. Photosynthesis uses this green pigment?

Down

- 1. The third step of the scientific method is?
- 2. The second to last step of the Scientific method is?

- 4. Tiny dots that make proteins?
- 6. Process by which plants use sunlight to make glucose?
- 9. Second step of cellular respiration?
- 10. The radiation from the sun that can be seen by the human eye?
- 11. Last step of Scientific method?
- 12. The cell's powerhouse?
- 13. Respiration with oxygen
- 14. First step of the Scientific method.
- 18. Cell organelle that regulates what enters and leaves the cell?
- 20. What is an educated guess?
