

Name: \_\_\_\_\_

Date: \_\_\_\_\_

# Rock Cycle

## Across

3. the consolidation of sediments resulting from the weight of overlying deposits.

8. igneous rocks that has either small or no crystal grains

10. igneous rock that have medium sized crystal grains

14. describes texture of metamorphic rock

15. \_\_\_\_\_ is to become crystallized again

18. the process of the compacted ground surrounding and binding together.

19. \_\_\_\_\_ is the opposite of erosion

20. \_\_\_\_\_ is the process in which sedimentary rocks are arranged in layers

## Down

1. touching/feeling rock

2. describes rocks minerals made up of

4. changes in the structure of something.

5. \_\_\_\_\_ is the process of making a solid

6. opposite of Foliated

7. type of rock formed from another type of rock being exposed to extreme heat and pressure changing it into another type of rock.

9. \_\_\_\_\_ is a type of rock formed by sediments compacting and cementing

11. What transports soil and sediments to one location to another?

12. \_\_\_\_\_ is the process in which material is dropped.

13. rock that forms as a result of volcanic activity at or near the Earth's surface

16. \_\_\_\_\_ is a type of rock formed from lava/magma cooling.

17. extrusive but instead of "ex" its "in"
