

Rock Cycle

Across

- 3. A rock formed by cooling slowly beneath the Earth's surface
- 11. Magma that has reached the Earth's surface
- 12. A rock formed when dissolved minerals precipitate from solution
- 13. A rock formed from organic material

- 14. A rock formed by cooling quickly above the Earth's surface

Down

- 1. A rock formed by extreme heat and pressure
- 2. Cause of a sedimentary rock
- 4. A rock formed without a band appearance
- 5. A rock formed by lava or magma

- 6. A rock formed by weathering and erosion
- 7. Cause of a metamorphic rock
- 8. molten rock beneath the Earth
- 9. A rock formed with a layered band appearance
- 10. A rock formed from mechanical weathering debris
