

# SCIENCE PROJECT CROSSWORD PUZZLE :P

**Across**

- 6. Table of the chemical elements
- 11. A solid material that is typically hard, shiny, malleable, fusible, and ductile, with good electrical and thermal conductivity
- 12. A coherent, typically large body of matter with no definite shape.
- 13. An element whose properties are intermediate between those of metals and solid nonmetals or semiconductors
- 14. A subatomic particle about the same mass as a proton but without an electric charge

- 15. The centre of an atom is called \_\_\_\_\_

- 16. a substance that flows freely but is of constant volume, having a consistency like that of water or oil
- 17. A minute portion of matter

**Down**

- 1. Composed of 2 or more different elements chemically combined (bonded)
- 2. A substance with a positive charge opposite sign of an electron
- 3. \_\_\_\_\_ have a stable subatomic particle with a charge of negative electricity

- 4. Composed of 2 or more different elements or compounds that are not chemically combined
- 5. The \_\_\_\_\_ is the region of negative charge surrounding an atomic nucleus associated with an atomic orbital
- 7. A substance that cannot be broken down chemically
- 8. firm and stable in shape; not liquid or fluid
- 9. a substance or matter in a state in which it will expand freely to fill the whole of a container, having no fixed shape
- 10. The outermost shell of an atom containing the valence electrons
