

# SPACE PUZZLE by: Juan Marquez

## Across

2. A distance as fast as light  
 3. A large space rock  
 6. Part of our atmosphere; we need it to breathe  
 11. Shows up at night; the color white; large  
 13. A vehicle designed to explore space  
 14. A natural force that pushes you to the core of the planet  
 15. Formed by the core of a SuperNova collapsing; nothing can escape it

16. A large space with many galaxies and trillions of stars  
 18. A massive explosion when the core of a sun collapses  
Down  
 1. Produces light at night(not the moon; the Sun is one of these)  
 4. An eruption on the Sun  
 5. Carries many universes and galaxies with trillions of stars  
 7. Traveling circle around the earth

8. A ball in space, made of ice, dust, and dirt, with a trail of blue  
 9. A vast group of stars, gas, and dust, held by gravity  
 10. Larger than an astroid and orbits the Sun  
 12. Everything is in it; the color black with stars  
 17. 9 Planets get heat from and orbit it
