Safety Precautions for Grooming a Resident with Alzheimer's Disease

Across

4. Make sure these fit appropriately when dressing a resident to protect skin
6. Get this from another CNA when working with an aggressive or agitated resident. *A synonym for assistance.
7. Don't rush, and use a lot of this virtue to keep your residents safe.
9. Do this with a stuffed animal or washcloth to divert a resident's attention so that a care can be completed safely
10. Look at your residents and make this so that you have their attention and they do not get frightened (If not in the puzzle, this answer would be 2 words starting with E and C.)

Down

1. Protect yourself and your resident with AD from agitation and aggression by using a lot of this; explain what you are doing step by step. *Starts with a C.
2. Know your AD resident by checking this document so you can safely care for him/her.* If not in the puzzle, this answer would be 2 words.
3. Use these rather than scissors for nail care to protect skin and to keep resident from harming herself or you
5. A safer type of razor to use with AD residents
8. Cover this in the bathroom when a resident with AD brushes their teeth so he/she does not feel like someone is looking at him/her
