

# Science

## Across

3. has 3 main uses: clinical events to deliver patient care, educational and professional development events for healthcare providers, and healthcare administrative events among providers and organizations.  
 6. means isolation from others  
 11. Electrocardiogram  
 12. Example of a monosaccharide  
 13. CCK stimulates the gall bladder to release  
 14. A nitrogenous group  
 15. A major macromolecule  
 16. Cannot cure viruses  
 18. is composed of a phosphate group, a deoxyribose sugar, and a nitrogenous base.

20. is the process that explains DNA nucleic acid language to RNA nucleic acid language  
 22. Diseases present in low population levels of a  
 23. contains a single type of nucleic acid (DNA or RNA) encased in a protein coat or capsid  
 24. between the ventricle and arteries and prevent backflow from the arteries

## Down

1. test for starch and a positive test is indicated by a change from light brown to dark blue-black in colour  
 2. volume of air remaining in the lungs at the end of a maximum expiration  
 4. among aboriginals is eight to ten times higher than overall Canadian rates

5. Not enough blood pressure against blood vessels  
 7. is a process that explains nucleic acid language to amino acid language  
 8. Used to measure respiration rate  
 9. biological preparation that provides active acquired immunity to a particular disease.  
 10. transmitted through ingestion of food and beverages contaminated with feces  
 17. is the alteration of the nucleotide sequence of the genome of an organism, virus, or extrachromosomal DNA  
 19. A disease that concerned Canadians in 2009/2010  
 21. can cause thrush/yeast infections
