

Science Chapter 4

Across

- 7. Process by which cells grow and are replaced
- 8. Plants' green pigment that absorbs energy from sunlight
- 9. Provides the external boundary for a cell
- 10. parts of a cell that break down food and release energy

Down

- 1. Bubble-like storage organelles

- 2. Living things are made of cells, which function as individual organisms or as the smallest unit in a larger organism
- 3. Process by which an organism produces reproductive cells
- 4. Group of cells working together
- 5. Uses lenses to magnify objects hundreds or thousands of times
- 6. Provide support for plant cells
