

Name: _____

Science Contract #1

Across

7. Rate of change of velocity occurs when an object changes speed, direction, or both
8. The distance an object travels per unit in time
9. Includes speed of an object and the both push or pull
10. Friction-like force that opposes motion of objects that move through air

Down

1. Distance and direction of an object change in position from the starting point
2. Push or pull
3. Occurs when an object changes position relative to a reference point
4. The force that opposes the sliding motion of two touching surfaces
5. Any two masses that exert an attractive force on each other
6. When two or more forces act on an object at the same time
