

Name: _____ Date: _____ Period: _____

Science Project

Across

- 3.** How plants make seeds
- 5.** The spreading of pollen
- 7.** When a plant seed is dormant
- 9.** The process that Phloem and the Xylem use to transport food and water
- 11.** The product of the pollen fertilizes the egg
- 12.** What guards the Omnuvles
- 13.** What makes the pollen

Down

- 14.** Female sex cell
- 16.** What sucks up water and minerals for the plant
- 18.** Helps plants reproduce
- 20.** The male part of the plant
- 21.** The process that makes food for the Plant

- 4.** How pollen makes its way to the ovary
- 6.** The female part of the plant
- 8.** Mae sex cell
- 10.** What helps give the plants energy
- 15.** Contains the sperm
- 17.** What attracts polinators
- 19.** The pores of the plant
