# Science Project

## Across

- 2. Float around cells and are also bound to the rough ER
- 3. Organelles found in plant cells. Produces food for a plant
- 5. Is covered in ribosomes. Packages proteins
- 6. The round body that is located inside of the nucleus

- 9. Jelly like fluid that fills a cell

- 10. Located inside of the nucleus. Made of DNA
- 12. Stores food and other nutrients a cell might need
- 13. A series of folded membranes. Builds lysosomes
- 14. A plant cell's protective outer layer
- 15. Controls all cell activity

## Down

- 1. The powerhouse of the cell
- 4. The protective outer layer of all cells
- 7. Contains digestive enzymes
- 8. any number of organized or specialized structures within a living cell
- 11. Acts as a storage organelle
