# Science Project

## **Across**

- 5. Lower layer, of the mantle that borders the outer core
- 8. German meteorologist
- 9. Earth's crust and part of the mantle are broken into parts
- 12. Princeton University scientist
- 13. Upper part of the mantle
- 14. Largest part of the Earth

- 16. Moves toward each other

- 17. Plastic-like layer below the lithosphere in the mantle
- 19. the research ship that researched rocks on the sea floor
- 20. Moves away from each other

## **Down**

- 1. Dutch mapmaker
- 2. Rigid, upper most part of the crust

- 3. Layer of the Earth that lies above the inner core
- 4. When the plates break into parts it causes.....

- 6. Made of basalt
- 7. made of granite
- 10. Slide past each other
- 11. Super continent
- 15. Inner most layer of the the Earth
- 18. Moves very slowly on the asthenosphere
