

Name: _____

Date: _____

Science Vocab 2.0

Across

3. mass cannot be created nor destroyed
7. usually irreversible and rearranges atoms
9. # of atoms to a element
10. mass/volume
11. # of molecules
13. a change that does not affect the form of a substance
14. properties during or after a chemical change
18. absorption of cold

19. substance made from mixing other substances together

20. absorption of heat

Down

1. chemical equation where reactants=products
2. color change, formation of a precipitate, gas formation, odor, temp.change
4. rearranges molecules or ionic structure

5. underwent a change during a reaction

6. used to observe or describe matter

8. reactants undergo change and become products

12. (single) found all across the periodic table

15. composed of two or more elements

16. substance deposited as a solid

17. undergoes change during a reaction
