

Name: _____

Science Vocab Puzzle

Across

4. a change in the physical form (solid to liquid)

8. part of the nucleus of an atom, positive charge

9. part of the nucleus of an atom, no charge

10. temperature when a solid starts to melt

13. the result of combining two different atoms

14. made of all the same types of atoms

16. temperature when a liquid starts to boil

Down

1. orbits the nucleus of an atom, negative charge

2. a change to a new substance

3. one of the atoms bonded to another atom in a chemical reaction

5. joining of two or more elements

6. the bonding of two or more atoms

7. makes up everything

11. atoms arranged in a geometrical pattern

12. smallest particle

15. joining of atoms
