

Name: _____ Date: _____ Period: _____

Science Vocab

Across

- 2. A time of year separated by weather
- 4. The imaginary line separating the light and the dark side of the moon
- 7. Get smaller
- 9. Half the Earth in distance
- 16. Partially see eclipse
- 18. The tide of minimum range
- 19. Less than half
- 21. Smaller waves
- 24. The point that is farthest away from the sun
- 26. The orbiting of Earth to go around the Sun

- 27. The vertical difference between low tide and high tide

- 28. a tide of increased range

Down

- 1. Get bigger
- 3. When the moon passes between the sun and Earth so the sun is partially or totally obscured
- 5. Larger waves
- 6. an imaginary line about which a body rotates
- 8. More than half
- 10. The imaginary middle line of the Earth that goes east to west
- 11. Moon moves through Earth's shadow

- 12. The darkest part of a shadow

- 13. The sun is as far north or south of the equator as possible

- 14. The time required for Earth to rotate once around its axis

- 15. The time required for Earth to orbit once around the sun

- 17. the point that is closest to the sun

- 20. Completely see eclipse

- 22. The moment when the sun appears to cross the celestial equator

- 23. Appears as half (actually 1/4) the moon

- 25. One complete trip around orbit
